

Release notes – Custom Regulations

Version	Published Date
4.9	12th December 2023

Overview

We have improved the look, functionality and user experience when using custom regulations. This new feature allows organisations to create, amend and maintain their own custom regulations.

What is new?

- Improvement to system functionality when using custom regulations.
- The ability to create amendments to existing custom regulations.
- The ability to effectively manage and maintain custom regulations.
- The ability to review regulation amendments using a side-by-side view comparison.

Why are we doing this?

To improve the functionality, and user experience when creating, amending, and maintaining custom regulations

Who does this affect?

Any user with the access rights to Edit, Approve and Publish regulations.

How do I use Custom Regulations on my site?

Click [here](#) to see a step by step guide to custom regulations.

FAQ

Q. Where do I add a custom regulations?

A. Custom regulations can be created via the Reference Data section within the Compliance / Quality modules (this is access rights driven)

Q. How do I add a custom regulation?

A. Simply follow the step by step guide within the "How do I use custom regulations on my site" section of this release note.

Q. Can I save unpublished regulation amendments items?

A. Yes, unpublished regulation amendments can be saved for review.

Q. Can I delete custom regulations if they are no longer relevant?

A. Yes, custom regulations items can be deleted.

Q. Can I add attachments to custom regulations?

A. Yes, image files can be added to custom regulation items

Q. Who manages my custom regulations?

A. Custom regulations are unique, and specific to your organisation. A nominated internal role, department, or individual should be made responsible for managing custom regulations and any prescribed amendments documented internally
