ATA Code Update

Reference

Revision

TL-UGA ATA-001 1.0

11th November 2024

Date

Overview

For operators who need to ensure ATA codes are captured accurately, it is now possible to confirm ATA codes when signing off a release. This feature is available in App version 1.34.1 and above.

Note: This feature restricts ATA code updates for deferred defects when using a digital book from MEL Manager i.e. MEL, CDL or NEF.

Enabling the ATA Code Confirmation Feature

To activate this feature, follow these steps in the Web Dashboard:

Go to Operator Settings - > Defect Configuration -> Amend ATA Details on Public Page (set this to YES)

ATA Code Confirmation on iPad

1. Adding a Defect

• A defect is added using the iPad or Web Dashboard following the standard process.

2. Starting the Defect Resolution Process

- On the iPad, begin the process to resolve the defect.
- On the **Type** page, you will see two additional fields:
 - ATA Chapter
 - ATA Section

If ATA codes were manually entered when the defect was created, the fields will automatically populate with those values. as shown in this screenshot below.

	ATA CHAPTER: ATA SECTION:	
	25 11	
	Please select the type of work completed:	
	Inspection	
	Part removal/exchange	
	Other Task	

3. Updating the ATA Code

- To update the ATA code, enter the new values in either the **ATA Chapter** or **ATA Section** fields.
- Once you select a type of work completed, you will be prompted to sign. This serves as a confirmation that the user is updating the ATA code.
- Tap Add Signature and enter your signature.
